The first, long-range, Bluetooth mesh for permanent outdoor lighting solutions

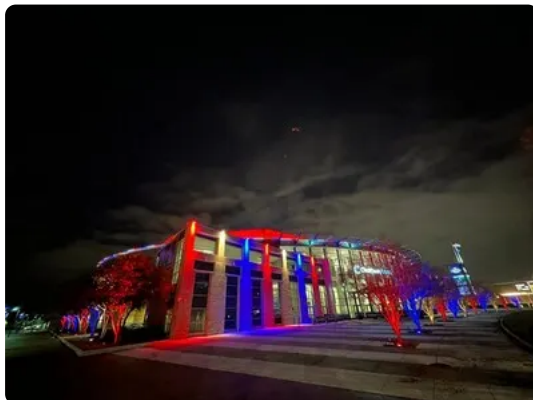

DALLAS, May 22, 2023 /PRNewswire/ -- MeshTek Labs, a leading Internet of Things (IoT) company that creates and builds smart lighting and other systems, has been recognized with a 2023 LightFair Innovation Award for its BlueHopper Permanent Outdoor Lighting. This next-generation outdoor lighting system offers digital color-changing, real-time scheduling, multi-user, and multi-network capabilities, and more seamlessly across 50+ types of products with state-of-the-art apps. The proprietary BLE mesh from the MeshTek Labs IoT platform provides the world's only long-range, bi-directional network connectivity with Bluetooth for devices with built-in artificial intelligence and edge computing.

BlueHopper Permanent Outdoor Lighting Powered by MeshTek

"We are proud of this award recognition of our innovative IoT platform for the outdoor lighting industry," said Swapnil Bora, CEO at MeshTek. "Our ability to control and manage thousands of devices within millions of square feet of areas using Bluetooth® is an unsurpassed milestone that is ideal for commercial, residential, and municipality use."

large-scale, multi-property installations. Supported by 33 issued patents, these solutions include long-range, bi-directional network connectivity, ready-to-go certified hardware, and robust software solutions.

"MeshTek is leading the increase of transformative digital lighting installations that were once cost-prohibitive and complex," said Mark Cuban one of ABC's "Sharks" on the hit show Shark Tank, and an investor in MeshTek. "Their patented, long-range Bluetooth
